

MARINE GRADE LANOLIN

► DISPLACES WATER ► REPELS MOISTURE ► LUBRICATES ► PREVENTS CORROSION

FOR HARSH CLIMATIC CONDITIONS & HEAVY DUTY INDUSTRIAL APPLICATIONS

BIODEGRADABLE & NON-CONDUCTIVE

Lubricates and protects chains, shackles, and anchors, providing excellent protective properties for ferrous metals

Offers long-lasting mechanical rust proofing, stopping squeaks and loosening rusted parts

Protects and preserves materials prone to corrosion and weathering, such as rubber, paintwork, timber, leathers, and most plastics

Lanoflex™ R55 Heavy Duty Lanolin is a powerful biodegradable formulation of refined mineral oil distillates, lanolin, and Vapour Corrosion Inhibitors. It has a firm adhesive tendency to most metal surfaces and dries leaving a tenacious layer of grease which provides a natural barrier to moisture and water, offering excellent protection from salt spray deposits.

Fantastic rust and corrosion protection for outboard motors and battery terminals

Safe to use on metal, fibreglass, formica, paint, rubber, enamel, neoprene, and plastic

Ideal for the long term waterproofing of equipment in seasonal storage
